## Function and design

Three-piece ball valve for easy service and maintenance.  
 Homogeneous liquid ball for tight shut-off and low pressure drop.  
 Self-compensating spindle packing provides a tight valve at high operating frequencies.  
 Blow-out safe antistatic spindle construction prevents the spindle from being pushed out during pressure surges.  
 Mounting flange according to ISO 5211 for actuators.  
 No valve disassembly required for service and installation of actuators.  
 Valves larger than DN50 have a round valve body/mounting flange.
